Learning Forward National Summer Conference Coming to Minnesota

The Learning Forward National Summer Conference is coming to Minnesota July 21-24, 2013. Be sure to add these dates on your calendar as this is a great rare opportunity to see some of the greatest and best minds in all of education.

CHECK OUT THE NEW TECH CALENDAR—a little something for everyone.

TIP/RESOURCE OF THE WEEK

Attend the FETC Annual Conference Virtually for Free

The award-winning producers of FETC (Florida Education Technology Corporation) and *T.H.E. Journal* invite you to participate in the FETC Virtual Fall event, focused on exploring the most pressing issues related to 21st Century Skills. This 100% online event brings several valuable education technology presentations straight to your desktop at your convenience.

Date: October 18

Time: 9:30 a.m.-5:00 p.m.

Cost: Free

All event information can be found by visiting the [FETC Conference website](#)

Reading Rocktober

Reading Rocktober is an exciting new program where learners of all ages can receive prizes just for doing what they already love, READING! It's simple: By setting reading goals and meeting them, students become eligible to receive rewards from participating sponsors.

By instilling a love of reading at a young age, students will develop a greater appreciation for reading that will continue their whole lives. Even more important, improved literacy and reading skills can help a student improve in other subjects as well.

By signing up for Reading Rocktober, students will be motivated to:

- Read for fun
- Read more often
- Improve their reading skills and overcome reading obstacles

Sign up for Reading Rocktober today! Follow this link, the program will run from October – April of this school year.

So join Read-It, grab a book and Rock on!

TECH TIPS

Last school year, we featured iPad Apps all year. Click [HERE](#) to view all the apps that were featured last school year.

Professor Garfield Cyberbullying

With the new regulations regarding teaching students responsible technology use, [Professor Garfield](#) could fill a void in adequate curriculum in the elementary schools. Professor Garfield goes through the basics of cyberbullying in a fun and engaging way. It's free, so give it a try today!
